

Defentect To Demonstrate DefenCall at Global Disaster Event, Exercise 24

NORWALK, Conn., (September 23, 2010) Defentect Group, Inc. (OTCBB: DFTC), a developer and provider of immediate intelligent messaging applications and services, announced today that the Company will participate in Exercise24 (“X24”) on September 24 & 25. X24 is a collaborative disaster-training event facilitated by San Diego State University’s Homeland Security Master’s Program and its Immersive Visualization Center (“Viz Center”). Many of the components of X24 will be highlighted on the Google Apps and Sites partnership of the Viz Center and the US Navy at InRelief.org (<http://www.inrelief.org>), which was a significant aid in disasters like Haiti, the Mexicali earthquake, and the Gulf oil spill.

X24 will focus on testing advanced technologies with the goal of improving the ability and velocity of communications between military and civilian organizations during a disaster. The exercise will play out through a multitude of scenarios including a tsunamigenic event, oil spills and severe property destruction resulting from several massive earthquakes in California. Participants will use the showcased technologies to test reporting effectiveness and measure the life saving abilities each technology provides.

Defentect has a long-standing relationship with the Viz Center and will be taking part in the event by providing participants, including government, state and commercial organizations, with its robust and innovative smartphone application, DefenCall. The application will be used to communicate information in real time from participants to the field commanders and the X24 command center.

DefenCall is available to smartphone users who wish to enhance their personal security and safety. A touch of the alert button will immediately communicate a user’s GPS location and other pertinent information to those who can be of immediate assistance. The use of DefenCall during X24 will demonstrate the versatility of Defentect’s technology and allow many different organizations to experience DefenCall’s ability to communicate critical and timely personal emergency and disaster information.

“We are proud to support InRelief.org and the X24 event,” commented Jeff Knapp, President and COO of Defentect Group. “We are constantly seeking new ways to employ our technology, and are honored with the opportunity to provide our application to X24 participants. This is an exceptional opportunity to demonstrate DefenCall as an effective and versatile application that can be used to enhance safety and security significantly in many situations.”

Prof. Eric Frost, Founder and Director of the SDSU Viz Center, and Co-Director of the Homeland Security Master’s Degree Program (with Jeff McIlwain) stated, “X24 is trying to assist our nation and many other nations in disaster response with the cleverness and affordability of these new technologies as they enable decision makers to have massive input from the public to help bring solutions to the community in times of extreme need.”
